(660)-346-0571

Notes by Natalie is designed by a board-certified music therapist in special education.

This program is music-based, therapeutic, and specially designed to address Individualized Education Program objectives, academic concepts, social-emotional development, physical attunement, cognitive functioning, and psychological processing.

Through the utilization of the Helping Friends toolset of Point Motion, body movements activate auditory feedback, which provides optimal therapeutic outcomes for students in special education.

Notes by Natalie aims to engage students' sensory motor functions to provide ideal therapeutic results, automate remote assessments and data collection for educators and related service providers, and provide classroom facilitation and music based resources to increase special education program effectiveness.

Notes By Natalie allows service providers to efficiently provide necessary services to improve student achievement and program effectiveness outcomes.
